## 10. OTHER RELEVANT SKILLS

---

By working with several species of seabirds, I gained experience in several fieldwork and laboratory skills: ringing, handling, taking biometric measurements; nest monitoring; blood, feather and faecal sampling; deploying and recovering tracking devices (GPS, accelerometers, geolocators, etc) (more information available in: [https://www.dropbox.com/s/2fhb4i2vgaiwdsn/Curriculum%20Vitae\\_TMilitao\\_Summary%20fieldwork%20experience.docx?dl=1](https://www.dropbox.com/s/2fhb4i2vgaiwdsn/Curriculum%20Vitae_TMilitao_Summary%20fieldwork%20experience.docx?dl=1)); performing stable isotope and trace element analysis. Moreover, my statistical skills include running mixed and additive models (LMM, GLMM, GAM and GAMM, SIMMR), as well as analysis of GPS data (kernel, EMbC) and geolocator (GeoLight, SGAT, ProbGLS) using R, QGIS and Pathtrack software, and I attended a workshop to learn how to apply Bayesian analysis to Species Distribution modelling. Due to my interest in avian conservation biology and population dynamics, I am also familiar with Mark and RMark and I have basic knowledge of E-SURGE.
